REPORT:DARE 2 SHARE

DARE 2 SHARE, a national level skill competition arranged by Indian Society of Heating Refrigeration and Air Conditioning Engineers (ISHRAE) Kolhapur Sangli Sub-Chapter and SITCOE Yadrav has put a new record among all the previous events considering all the concerns. The objective of the event was to make the quarantine time more fruitful and to create awareness about the importance of Youth Skills in current scenario on the special occasion of World Youth Skills Day.

It was held on 15th July 2020 and was conducted purely through online mode. Participants have had to register for the same via registration link with which all their details were collected with reasonable amount of registration charges created by organizer committee. The links of the same were provided to the participants via their E-Mails. The basic theme of the event was to enhance youth skills of participants in which they had to present the given recent topics in the way of art form in which they are excellent. The topics that were provided by the organizers were:

- Youth and Depression
- Online Learning
- Lockdown and Unemployment
- COVID-19 and Environment

The art forms accepted for the submission were;

- Video
- Singing
- Dancing
- Stand Up
- Speech
- Article Writing
- Drawing
- Any other art

The duration of the competition were set flexible considering participants' overwhelming response. The most precious thing about the DARE 2 SHARE is that it has got tremendous number of participants in the count of 40+ groups in overall categories. The registered participants were from the various states of India. Almost all of them did the submission. After the first round top 10 art forms were selected by the organizing committee on the basis of topic, content and unique features in it. For the analysing purpose of art forms two judges including Mr. Sujit Kumbhar (Asst. Professor, SITCOE, Yadrav), and Miss. Shirin Patel (Project Manager, Fusion HVAC Solutions Pvt. Ltd., Pune) were invited. The prize distribution ceremony was held on 20th July, 2020, through which participants and winners were appreciated via online mode. All of them were admired with participation E Certificates and winners were honoured with attractive money prizes.

Art Form	Count
Video	4
Singing	3
Dance	1
Stand Up	2
Speech	11
Article	14
Drawing	12
Other Arts	2
TOTAL	49

❖ Winner Details:

1st Winner: (Divisional Winners)

Kamarali Shams Mushrif.

Sudhanshu Suhas Rankhambe.

2nd Winner:

Group of;

Uddhav Prashant Salvi.

Samiksha Kishor Jadhav.

LOCKDOWN AND UNEMPLOYMENT

The Covid-19 virus began to spread in the city of Wuhan in December 2019. From then it spread over many other countries, due to which many countries declared complete lockdown to contain the spread of virus. The effect of lockdown was such that industries, educational institutions, travel and tourism industry, construction were completely halted, due to which many people were laid from their jobs. The larger effect was seen in the lives of the migrant labourers and daily wage workers who earn their livelihood on daily basis and lakhs of people turned destitute in a few days. Many of the workers due to lack of financial resources were forced to walk hundreds of kilometres to their native place.

India's unemployment rate rose to 26.2% within a month of lockdown. It was estimated that over 14 crore people lost their jobs. Due to such trembling condition of the India's economy, Finance Minister Nirmala Sitharaman on May 18 announced the last tranche of the ₹20 lakh crore Aam Nirbhar Bharat Abhiyan economic packages to fight the coronavirus pandemic led economic slowdown in the country. The economic stimulus package included measures like free food grains, liquidity measures for MSMEs, amendments in Essential Commodities Act, increase in public expenditure health, among others.

But slowly in the month of June the lockdown restrictions were lifted due to which there was a sharp decline in the rate of unemployment. The improvement comes as offices, shops reopened after the government lifted nearly all lockdown curbs after more than two months. It has been a difficult time for the whole world but as Napoleon Hill said 'In every adversity lies the seed of an equal or greater opportunity.' So we have to tackle this unfortunate situation and hope that this will end very sooner.

E-Learning - A New Normal for Education System!

E-Learning going to be the new normal for the education system due to the COVID-19 pandemic? What does the future look like? While lot of sectors are affected by the pandemic, one of the crucial changes is in the delivery of content between the teacher and the students. The legacy training methods were little sluggish in adapting new technological reforms, but the current COVID-19 pandemic has increased the pace of adoption of e-learning.

Increasing in penetration of internet across India is a major factor driving the growth. Advancements in the field of AI and IoT have enhanced the user experience. Some of the recent examples in the development of E-Learning is the TV channel launched by the Union HRD Ministry for students. It has also launched a secondary direct to home channel called Swayam Prakash.

The global online education market is projected to witness an annual growth of 8.2% during the forecast period to reach a total market size of US \$319.167 billion in 2026.

COVID-19 has brought a second wind to higher education in India. Here are three benefits of online education:

- 1) Flexibility and Convenience
- 2) Some High Quality
- 3) Continue in Your Profession

One of the biggest perks of online learning is that students can get access to a personalized learning experience, instant support, faster doubt clearing, and increased effectiveness of animated learning are some other factors contributing to the growth of online education. Also, there are some challenges to e-learning. While the future of education is about being more creative and empathetic, moral values can only be taught by people. Low social interaction between the peers can also affect the learning outcome of a student.

Looking at the aforementioned pros and cons, the pros of online learning seem to outweigh the cons, especially in the current global scenario.
