## (An Autonomous Institute)

Yadrav (Ichalkaranji)–416121, Dist. – Kolhapur

## Semester III
## Fluid and Thermal Engineering

| 23MT2301 | PCC | Fluid and Thermal Engineering | 3-0-0 | 3 Credits |
|----------|-----|-------------------------------|-------|-----------|

| Teaching Scheme | Examination Scheme |
|-----------------|--------------------|
| Lecture: 3 hrs/week | CA–I :10 Marks<br>CA–II :10 Marks<br>Mid Semester Exam: 30 Marks<br>End Semester Exam: 50 Marks |

**Pre-Requisites**: Basic physics, Basic mathematics, Fundamentals of engineering

**Course Outcomes:** At the end of the course, students will be able to:

| CO1 | Explain fluid characteristics, including density, viscosity, and surface tension. |
|-----|-----------------------------------------------------------------------------------|
| CO2 | Elaborate fluid flow patterns, continuity equations, and Bernoulli's equation |
| CO3 | Outline basic thermodynamic concepts, laws, and applications. |
| CO4 | Importance of heat conduction, convection, and radiation, along with heat exchangers. |
| CO5 | Discuss compressors, gas turbines, and their applications. |
| CO6 | Elaborate cooling systems, psychometrics, and real-world applications. |

**Course Contents:**

| | |
|---|---|
| **Unit 1 –Properties of Fluids**<br>Characteristics of fluids: Mass density, specific density, specific gravity, dynamic viscosity, kinematic viscosity, surface tension, compressibility, vapour pressure and cavitation.<br>Fluid Statics: Hydrostatics law, Pascal's law, Pressure at a point, Total pressure, Centre of pressure, Buoyancy, Stability of submerged and floating bodies, Metacentres. | [6] |
| **Unit 2 –Fluid Kinematics and Dynamics**<br>Introduction to Fluid Kinematics: Types of flows, continuity equation (Cartesian coordinate), visualization of flow field (stream, path and streak Line), stream and velocity potential function.<br>Fluid Dynamics: Euler's equation of motion along a streamline, Bernoulli's equation, Applications of Bernoulli's equation, Flow measurement techniques: Venturi meter, Orifice meter, Pitot tube | [6] |
| **Unit 3-Introduction of thermodynamics**<br>Basic concepts: system, surroundings, and properties of thermodynamic systems, Thermal equilibrium, processes, and cycles. | [6] |

**Head**
Dept. of Mechatronics Engineering
SIT COE,Yadrav

| | |
|---|---|
| Laws of thermodynamics: Zeroth law, First law, and Second law.<br>Application of Thermodynamics: Heat Engine, Thermal Efficiency of Heat Engine, Heat Pump, Refrigerator, Carnot Cycle, Carnot Theorem | |
| **Unit 4 Heat Transfer**<br>Introduction to heat transfer mechanisms: conduction, convection, radiation, Thermal conductivity and heat transfer coefficient, Thermal Insulation, Fourier's law, Newton's law of cooling, Stefan-Boltzmann law<br>Heat exchangers: types, applications, and basic design considerations. Introduction to electronic cooling - Discussion on active and passive methods. | [6] |
| **Unit 5 Compressor and Gas turbine**<br>Introduction to Compressors: Definition, purpose, and applications, Difference between Centrifugal and Axial Compressors. Typical applications in HVAC, refrigeration, and small-scale gas turbines, jet engines. Construction and performance<br>Introduction to Gas Turbines: Definition, purpose, and applications, Simple Gas Turbine cycle, Combined and cogeneration cycles, Introduction to Aircraft Propulsion and Rocket Propulsion | [7] |
| **Unit-6: Refrigeration and Air conditioning**<br>Introduction to Refrigeration and Air Conditioning, Refrigeration Systems, Refrigerants, Components, Air Conditioning Systems, Psychometrics: properties of moist air, psychrometric processes, Types of air conditioning systems, Refrigeration and Air Conditioning Applications<br>Detailed case studies and real-world applications in fluid and thermal engineering from various sectors, Articles and case studies from journals and industry reports) | [6] |

**Text Books:**

1. Sukumar Pati, "Fluid Mechanics and Hydraulics Machines", TATA McGraw Hill.
2. Munson, Young and Okiishi, "Fundamentals of Fluid Mechanics", Wiley India
3. Modi P. N. and Seth S. M, "Hydraulics and Fluid Mechanics", Standard Book House.
4. P.K. Nag, Heat & Mass Transfer, McGraw Hill Education Private Limited.
5. M.M. Rathod, Engineering Heat and Mass Transfer, Third Edition, Laxmi Publications.
6. V. M. Domkundwar, Heat Transfer, Dhanpat Rai & Co Ltd.
7. Arora, S. C., and S. Domkundwar. *A Course in Refrigeration & Air-conditioning: Environmental Engineering.* Dhanpat Rai, 1980.

**Reference Books:**

1. Kundu, Cohen, Dowling, "Fluid Mechanics", Elsevier India
2. Potter Wiggert, "Fluid Mechanics", Cengage Learning
3. Fox, Pichard, "Introduction to Fluid Mechanics", McDonald- Wiley
4. Bela G. Liptak, Instrument Engineers' Handbook – Process Control and Optimization, Volume I & II, Taylor & Francis
5. Franck P. Incropera, David P. DeWitt – Fundamentals of Heat and Mass Transfer,
6. Khurmi, R. S. (2006). Textbook of Refrigeration and Air Conditioning. India: S Chand & Company Limited.

## Sensors and Instrumentation

| 23MT2302 | PCC | Sensors and Instrumentation | 3-0-0 | 3 Credits |
|---|---|---|---|---|

| Teaching Scheme | Examination Scheme |
|---|---|
| Lecture: 3 hrs/week | CA–I :10 Marks<br>CA–II :10 Marks<br>Mid Semester Exam: 30 Marks<br>End Semester Exam: 50 Marks |

**Pre-Requisites**: Basic knowledge of Semiconductor Physics and Basic Electronics

**Course Outcomes:** At the end of the course, students will be able to:

| CO1 | Select different types of transducers and sensors for given application. |
|---|---|
| CO2 | Illustrate Signal Conditioning Systems. |
| CO3 | Identify and use data acquisition System. |
| CO4 | Select relevant instrument measurement devices. |
| CO5 | Select relevant thermal sensor measuring devices |
| CO6 | Explain different instruments used for displacement, Strain, Flow, Pressure & Speed Measurement |

**Course Contents:**

| Unit 1: Introduction to Instrumentation and Sensors.<br>Introduction to measurement, Static & Dynamic Characteristics of measurement, Instrumentation systems architecture, Definition-Sensors, Transducers, Classification of transducers -Resistive, Capacitive and inductive, Specifications of sensors/Transducers, Sensor networks architecture. | [6] |
|---|---|
| Unit 2: Analog Signals<br>Principles of analog signal conditioning, Signal-Level and Bias Changes, Linearization, Conversions, Filtering and Impedance Matching, Concept of Loading, Passive circuits: Voltage Divider, Bridge Circuits, Bridge Resolution, Wheatstone Bridge. | [6] |
| Unit 3: Digital Signal Conditioning.<br>Digital Electronics Circuits: comparator, converter, Digital-to-Analog Converters (DACs), Analog-to-Digital Converters (ADCs): Flash, SAR, Dual Slope, Data-Acquisition Systems: Hardware and Software of Data Acquisition System (DAS), Characteristics of digital data: Digitized Value, Sampled Data Systems, Linearization | [6] |
| Unit 4: Introduction To Instrument Measurement: | [6] |

**Head**
Dept. of Mechatronics Engineering
SIT COE,Yadrav

| | |
|---|---|
| Introduction, Static Characteristics, Error In Measurement, Types Of Static Error, Sources Of Error, Dynamic Characteristics, Digital Voltmeters- Introduction, Types Of DVM , General Specifications Of DVM, Digital Multimeter, Digital Measurements Of Time, Digital Frequency Meter , Q Meter, Instrument Calibration. | |
| **Unit 5: Thermal Sensors.**<br>Electrical Methods: RTD, Thermistors, Thermocouples, Thermoelectric Effects, Laws of Thermocouple, Thermocouple characteristics, Non Electrical thermal sensor: Bimetallic Strip, Vapor Pressure Thermometers, Liquid-Expansion Thermometers, Solid-State Temperature Sensors. | [7] |
| **Unit 6: Mechanical Sensors**<br>Displacement Sensors: LVDT, Potentiometer, Strain measurement- Metal Strain Gauges and Semiconductor Strain Gauges (SGs),Load Cell,Flow sensors: Obstruction type flow meter-Venturimeter, Orifice plate, Pitot tube, Rotameter, Electromagnetic flow meter, Pressure sensors: Pirani Gauge, Thermocouple vacuum gauge, Photoelectric, Piezoelectric pressure transducer. Speed Sensors: Eddy current generation tachometer, Stroboscope. | [6] |

**Text Books:**

1. A course in Electrical, Electronics measurement and Instrumentation, A.K.Sawhney

2. Mechanical & Industrial measurements, Jain R.K., Khanna Publications, New Delhi.

3. Mechanical measurements & instrumentation, Rajput.R.K., S.K.Kataria and sons, New Delhi.

4. Electronic Instrumentation, H. S. Kalsi, MGH, 3rd Edition

**Reference Books:**

1. Electronic Instrumentation and Measurement Techniques, Welfrick Cooper.

2. Instrumentation for Engineers And Scientists , John Turner ,II Edition , Wiley

3. Electronic Instrumentation and Measurements, David A Bell, Third Edition, Oxford.

4. Instrumentation for Engineering Measurements, James W Dally, II Edition , Wiley India

**Head**
**Dept. of Mechatronics Engineering**
**SIT COE,Yadrav**

**Digital Electronics & Microcontrollers**

| 23MT2303 | PCC | Digital Electronics & Microcontrollers | 3-0-0 | 3Credits |
|---|---|---|---|---|

| Teaching Scheme | Examination Scheme |
|---|---|
| Lecture:3hrs/week | CA–I :10 Marks<br>CA–II :10 Marks<br>Mid Semester Exam: 30 Marks<br>End Semester Exam:50Marks |

**Pre-Requisites**: Basic Electronics, Logic Gate

**Course Outcomes:** At the end of the course, students will be able to:

| CO1 | Apply Boolean laws/k map method to reduce given Boolean function |
|---|---|
| CO2 | Design combinational logic circuits. |
| CO3 | Design and Analyze Synchronous and Asynchronous Sequential logic circuits |
| CO4 | Explain 8051 architecture, addressing modes & instruction set. |
| CO5 | Make use of 8051 to interface stepper motor, keyboard, ADC using programmable peripheral |
| CO6 | Develop assembly language program for arithmetic & logical operations using 8051 |

**Course Contents:**

| **Unit 1: Fundamentals of Digital Electronics**<br> Number Systems: binary, signed binary, octal, hexadecimal number, binary arithmetic, ones and two's complements arithmetic<br>Introduction of Boolean algebra, Concept of Min Terms-Max terms, SOP-POS forms, Reduction Techniques, K- Map, K-map with Don't Care Condition | [6] |
|---|---|

**Head**

SIT COE,Yadrav

*Shri Shamrao Patil (Yadravkar) Educational & Charitable Trust's*

# Sharad Institute of Technology College of Engineering
## (An Autonomous Institute)
Yadrav (Ichalkaranji)-416121, Dist. – Kolhapur

| | |
|---|---|
| **Unit 2: Combinational Circuits**<br>Design Combinational Logic: Adder, look ahead carry generator, Sub Tractor, Sub tractor using 1's complement & 2's Complement, BCD Adder, serial adder, ALU, elementary ALU design, Magnitude Comparator, Parity generators/checkers, Code converters, Design of Multiplexers and Demultiplexers, Encoders, Decoders, BCD - to - 7 segment decoder. | [6] |
| **Unit3: Sequential Circuits**<br>1-bit memory cell, latches and Flip-Flops (S-R, D, J-K & T), Use of preset and clear inputs, Excitation table for Flip-Flops, Conversion of Flip-Flops Applications of Flip-Flops: Shift Registers, Counters-Ripple counters, Synchronous Counters, Ring Counters, and Johnson Counter | [8] |
| **Unit4: Introduction to MCS 51**<br>Introduction to MCS 51 Family, Architecture, Functional Pin out diagram, Programming Model, Memory Organization, Addressing Modes, Instruction Set: Classification, Reset Circuit, Oscillator Circuit, Introduction to Assembly Language Programming | [6] |
| **Unit 5: Hardware overview**<br>Input/output Ports, Counters & Timers, Serial Communication, Interrupt Input/output Ports, Counters & Timers, Serial Communication, Interrupt<br>Note: Structure of Above, Related S.F.R, Instruction, Associated Program | [6] |
| **Unit6: Interfacing & Application**<br>Interfacing: LCD, ADC, DAC, Key board. Minimum System Design & Application: Interfacing of Temperature Sensor (LM 35) 8051 Connection to RS 232.<br>Note: Assembly Language Programming to be done using Keil or Pinnacle Simulator | [6] |

**Text Books:**
1. Fundamentals of Digital Circuits by Anand Kumar, TMH publication.
2. M Morris Mano: Digital Logic and Computer Design, 10th Edition, Pearson, 2008
3. The 8051 Microcontroller by Ayala 3rd Edition
4. The 8051 Microcontroller & Embedded Systems by Muhammad Ali Mazidi & Janice Gillispie Mazidi Pearson Edition L.P. E

**Reference Books:**
1. Digital Design Principles, Wakerly, Pearson, 4th Edition, 2006
2. Digital Design, Leach, Malvino, 4th Edition, TMH,2011
3. Modern Digital Electronics, R.P. Jain, 3rd edition TMH,2011
4. Architecture Programming, Interfacing & System design By Rajkamal Pearson edition

**Head**
Dept. of Mechatronics Engineering
SIT COE,Yadrav

## Fluid and Thermal Engineering Laboratory

| 23MT2304 | PCC | Fluid and Thermal Engineering Laboratory | 0-0-2 | 1 Credits |
|----------|-----|------------------------------------------|-------|-----------|

| Teaching Scheme: | Evaluation Scheme: |
|------------------|--------------------|
| Practical: 2 hours/week | CA–I :15 Marks<br>CA –II :15 Marks<br>End Semester Examination: 20 Marks |

**Pre-Requisites:** Engineering Physics, Engineering Mechanics

**Course Outcomes:** At the end of the course students will be able to -

| CO1 | Measure and analyze fluid behavior, including pressure, viscosity, and energy conservation. |
|-----|---------------------------------------------------------------------------------------------|
| CO2 | Evaluate thermal properties and heat transfer in various materials and systems. |
| CO3 | Demonstrate practical skills in operating, maintaining, and evaluating engine and compressor systems. |
| CO4 | Interpret theoretical knowledge with practical applications through simulations, experiments and industrial visits. |

### List of Experiments:

At least a minimum of 8 experiments should be performed from the following list.

1. Demonstrate Pressure Measuring Devices

2. Calibration of Venturi meter and Orifice meter

3. Verification of Bernoulli's equation

4. Determination of major losses /minor losses in pipe fittings Apparatus

5. Reynolds Experiment

6. Study and Trial on Blower

7. Dismantling and assembly of IC engines

8. Study of two and four-stroke petrol and diesel engines

9. Determination of Heat Transfer Coefficient under forced convection

10. Software demonstration related to fluid mechanics and thermal engineering simulations

11. Determination of thermal resistance and temperature distribution in a Composite wall.

12. Industrial visit report

Head
Dept. of Mechatronics Engineering
SIT COE, Yadrav

## Sensors and Instrumentation Laboratory

| 23MT2305 | PCC | Sensors and Instrumentation Laboratory | 0-0-2 | 1 Credits |
|---|---|---|---|---|

| Teaching Scheme: | Evaluation Scheme: |
|---|---|
| Practical: 2 hours/week | CA–I :25 Marks<br>CA –II :25 Marks |

**Pre-Requisites:** Basic knowledge of Semiconductor Physics and Basic Electronics.

**Course Outcomes:** At the end of the course students will be able to -

| CO1 | Explain the characteristics of Instruments. |
|---|---|
| CO2 | Select appropriate sensor for given application. |
| CO3 | Illustrate various smart sensors with their applications. |

**List of Experiments:**

At least minimum 8 experiments should be performed from the following list.

1. Introduction to Instrumentation& Identify contact &Non-contact type Instruments.

2. Study of Characteristics of LVDT.

3. Study of potentiometer as Error Detector.

4. Characteristics of temperature sensors.

5. Measurement of Speed using tachometer/Photoelectric pickup/Proximity switch.

6. Pressure measurement using pressure cell.

7. Study of Hall effect sensor.

8. Measurement of strain using strain gauge.

9. Measurement of flow using Rotameter.

10. Measurement of sound using sound meter.

11. Study of Liquid level measurement using proximity switch.

12. Study of Smart sensors.

13. Case Study of different sensors used in Automobiles.

**Head**
Dept. of Mechatronics Engineering
SIT COE,Yadrav

**Text Books:**

1. A course in Electrical, Electronics measurement and Instrumentation, A.K.Sawhney
2. Mechanical & Industrial measurements, Jain R.K., Khanna Publications, New Delhi.
3. Mechanical measurements & instrumentation, Rajput.R.K., S.K.Kataria and sons, New Delhi.

### Digital Electronics and Microcontrollers Laboratory

| 23MT2306 | PCC | Digital Electronics and Microcontrollers Laboratory | 0-0-2 | 1 Credits |
|---|---|---|---|---|

| Teaching Scheme | Examination Scheme |
|---|---|
| Lecture:2hrs/week | CA –I :15 Marks<br>CA–II:15 Marks<br>End Semester Examination:20Marks |

**Pre-Requisites**: Basic Electronics, Logic Gate

**Course Outcomes:** At the end of the course, students will be able to:

| CO1 | Demonstrate the truth table of logic gates and combinational circuits using logic gates. |
|---|---|
| CO3 | Construct sequential circuits using logic gates or IC's. |
| CO4 | Develop an assembly language program for arithmetic & logical operations using 8051 |
| CO5 | Design a circuit to interface stepper motor, keyboard, ADC to 8051. |

### List of Experiments:

Minimum 8 experiments from above list out of which at least 4 should be on 8051 Microcontroller.

1. Implementation of Boolean Logic Functions using logic gates and combinational circuits

2. Design and implement Half adder, Full Adder, Half Subtractor, Full Subtractor using basic gates.

3. Given any 4-variable logic expression, simplify using Entered 16 Variable Map and realize the simplified logic expression using 8:1 multiplexer IC.

4. Design and implement code converter I) Binary to Gray II) Gray to Binary Code using basic gates.

5. Design and verify the Truth Table of 3-bit Parity Generator and 4-bit Parity Checker using basic logic gates with an even parity bit.

6. Realize a J-K Master/Slave Flip-Flop using NAND gates and verify its truth table.

7. Write an ALP for 8051 Addition, Subtraction, Multiplication & Division

**Head**
Dept. of Mechatronics Engineering
SIT COE,Yadrav

8. Data transfer and data exchange using 8051.

9. Conditional Operations using 8051.

10. Timer Operation for square wave generation using 8051

11. Serial data transmission using 8051.

12. Toggle bits of Port.

13. LCD Interfacing, stepper motor interfacing using 8051.

## Text Books:

1. Fundamentals of Digital Circuits by Anand Kumar, TMH publication.

2. M Morris Mano: Digital Logic and Computer Design, 10th Edition, Pearson, 2008

3. The 8051 Microcontroller By Ayala 3rd Edition

4. The 8051 Microcontroller & Embedded Systems By Muhammad Ali Mazidi & Janice Gillispie Mazidi Pearson Edition L.P.E

## Reference Books:

1. Digital Design Principles, Wakerly, Pearson, 4th Edition, 2006

2. Digital Design, Leach, Malvino, 4th Edition, TMH,2011

3. Modern Digital Electronics, R.P. Jain, 3rd edition TMH,2011

4. Architecture Programming, Interfacing & System design By Rajkamal Pearson edition

Shri Shamrao Patil (Yadravkar) Educational & Charitable Trust's

# Sharad Institute of Technology College of Engineering
## (An Autonomous Institute)
Yadrav (Ichalkaranji)-416121, Dist. – Kolhapur

**Course Contents:**

| | |
|---|---|
| **Unit-I: Introduction to Energy Efficiency and Automation:** Basic concepts of energy efficiency. Definition and significance of energy efficiency, Importance of energy conservation in the context of global sustainability goals, Overview of automation technologies and their applications. Role of automation in enhancing efficiency and productivity. | [3] |
| **Unit-II: Energy Efficiency and Automation Technologies:** Energy-efficient technologies and practices, Lighting systems, HVAC (Heating, Ventilation, and Air Conditioning), Motors and drives, building envelope improvements, role of automation in enhancing energy efficiency, Integrating renewables with existing systems | [5] |
| **Unit-III: Automation in Energy Efficiency** Basics of automation, Sensors and actuators, Building Management Systems (BMS), Industrial automation and control systems, smart grid concepts and technologies, Demand response and energy storage, Smart meters and advanced metering infrastructure (AMI) | [4] |
| **Unit-IV: Energy Management Strategies** Energy management standards (ISO 50001), Energy performance indicators, Continuous improvement and optimization techniques, Role of Internet of Things (IoT) in energy management | [5] |
| **Unit-V: Optimization techniques for energy-efficient Automation** Optimization techniques for energy-efficient operation, Process Optimization, Energy Management Systems, Energy Audits and Monitoring, Machine learning algorithms for energy prediction and optimization, Real-time energy management strategies, Energy Storage Systems | [4] |
| **Unit-VI: Case Studies and Real-world Applications** Detailed case studies from various sectors, Best practices and lessons learned, Group discussions and presentations (Articles and case studies from journals and industry reports) | [3] |

**Text Books:**

1. D. Yogi Goswami and Frank Kreith, Energy Efficiency and Renewable Energy Handbook
2. D. Yogi Goswami and Frank Kreith, Energy Management and Conservation Handbook
3. Donald A. Coggan, Fundamentals of Industrial Control: Practical Guides for the Industrial Technician

**Reference Books:**
1. Fereidoon P. Sioshansi, Smart Grid: Integrating Renewable, Distributed & Efficient Energy
2. John C. Andreas, Energy Efficiency: Principles and Practices
3. Giovanni Petrecca, Industrial Energy Management and Efficiency
4. Stamatios Manesis and George Nikolakopoulos, Introduction to Industrial Automation
5. Design and Development of Efficient Energy Systems. (2021). United Kingdom: Wiley.
6. O.V. Gnana Swathika, K. Karthikeyan, Sanjeevikumar Padmanaban, Smart Buildings Digitalization Case Studies on Data Centers and Automation Edited

### Basket B: Composite Material Technology

| 23MTMDB1 | MDM | Composite Material Technology | 2-0-0 | 2 Credits |
|----------|-----|-------------------------------|-------|-----------|

| Teaching Scheme | Examination Scheme |
|-----------------|--------------------|
| Lecture: 2 hrs/week | CA–I :10 Marks<br>CA–II :10 Marks<br>Mid Semester Exam: 30 Marks<br>End Semester Exam: 50 Marks |

**Pre-Requisites**: Engineering Physics, Engineering Chemistry, Basics of Mechanical engineering.
**Course Outcomes:**
At the end of the course, the student will be able to:

| CO1 | Explain the fundamentals of composites |
|-----|----------------------------------------|
| CO2 | Identify the polymer matrix composites and various processes used in making the polymer matrix composites |
| CO3 | Identify the metal matrix composites and various processes used in making the metal matrix composites |
| CO4 | Identify the ceramic matrix composites and various processes used in making the ceramic matrix composites |
| CO5 | Discover, understand and make effective use of non-conventional composites |
| CO6 | Compare, choose and make effective use of carbon-carbon composites |

**Course Contents:**

| **Unit-1 Introduction to Composite Materials**<br>Introduction to Composite Materials: Definition, classification & brief history of composite materials, advantages, disadvantages. Constituent of composite materials: Reinforcements, Matrix, Coupling agents, coatings & fillers. Composites for aerospace applications. Characterization of composite materials - Mechanical Properties, Thermal Properties. | [5] |
|---|---|
| **Unit-2 Polymer Matrix Composites (PMC)**<br>Polymer Matrix Composites (PMC): Processing of PMC's; Processing of Thermoset Matrix Composites, Thermoplastic Matrix Composites. Properties & applications of PMC's. | [4] |

Head
Dept. of Mechatronics Engineering
SIT COE,Yadrav

### Basket C: Computer Architecture and Organization

| 23MTMDC1 | MDM | Computer Architecture and Organization | 2-0-0 | 2 Credits |
|---|---|---|---|---|

| Teaching Scheme | Examination Scheme |
|---|---|
| Lecture: 2 hrs/week | CA–I :10 Marks<br>CA–II :10 Marks<br>Mid Semester Exam: 30 Marks<br>End Semester Exam: 50 Marks |

**Pre-Requisites**: C Programming

**Course Outcomes:** At the end of the course, students will be able to:

| CO1 | Identify various components of computer and their interconnection |
|---|---|
| CO2 | Understand basics of computer Arithmetic |
| CO3 | Identify basic components and design of the CPU: the ALU and control unit. |
| CO4 | Compare and select various Memory devices as per requirement. |
| CO5 | Compare various types of IO mapping techniques |
| CO6 | Criticize the performance issues of cache memory and virtual memory |

Head
Dept. of Mechatronics Engineering
SIT COE,Yadrav

## Course Contents:

| | |
|---|---|
| **Unit-1 Structure of Computers**<br>Computer types, Functional units, Basic operational concepts, Von-Neumann Architecture, Bus Structures, Software, Performance, Multiprocessors and Multicomputer, Data representation, Fixed and Floating point, Error detection and correction codes. | [5] |
| **Unit-2: Computer Arithmetic**<br>Addition And Subtraction, Multiplication and Division algorithms, Floating-point Arithmetic Operations, Decimal arithmetic operations | [3] |
| **Unit-3: Basic Computer Organization and Design**<br>Instruction codes, Computer Registers, Computer Instructions and Instruction cycle. Timing and Control, Memory-Reference Instructions, Input-Output and interrupt. Central processing unit: Stack organization, Instruction Formats, Addressing Modes, Data Transfer and Manipulation, Complex Instruction Set Computer (CISC) Reduced Instruction Set Computer (RISC), CISC vs RISC and advanced metering infrastructure (AMI) | [4] |
| **Unit-4: Register Transfer and Micro-Operations**<br>Register Transfer Language, Register Transfer, Bus and Memory Transfers, Arithmetic Micro-Operations, Logic Micro-Operations, Shift Micro-Operations, Arithmetic logic shift unit. Micro-Programmed Control: Control Memory, Address Sequencing, Micro-Program example, Design of Control Unit. | [4] |
| **Unit-5: Memory System**<br>Memory Hierarchy, Semiconductor Memories, RAM (Random Access Memory), Read Only Memory (ROM), Types of ROM, Cache Memory, Performance considerations, Virtual memory, Paging, Secondary Storage, RAID. | [4] |
| **Unit-6: Input Output and Multiprocessors**<br>I/O interface, Programmed IO, Memory Mapped IO, Interrupt Driven IO, and DMA. Characteristics of multiprocessors, Interconnection structures, Inter Processor Arbitration, Inter processor Communication and Synchronization, Cache Coherence. | [4] |

## Aptitude Skills- I (Verbal Ability)

| 23HSSM01 | VEC | Aptitude Skills- I | 1-0-0 | 1 Credit |
|----------|-----|--------------------|-------|----------|

| Teaching Scheme: | Examination Scheme: |
|------------------|---------------------|
| Lecture: 1hr/week | CA-I:25 Marks<br>CA-II :25 Marks |

**Pre-Requisites:** Basic Mathematics

**Course Outcomes:** At the end of the course, students will be able to:

| CO1 | Apply sentence formation rules to spot the error |
|-----|--------------------------------------------------|
| CO2 | Solve the questions based on the types of tenses |
| CO3 | Solve the questions based on Direct/Indirect Speech and Passive/active voice and Substitution and Elimination |
| CO4 | Make use of Proverbs, Idioms and phrases in sentence construction and the vocabulary |

**Course Contents:**

| Unit 1 | Structure and Types of Sentences, Conditional Sentences | [3] |
|--------|---------------------------------------------------------|-----|
| Unit 2 | Present tense, Past tense, Future tense, Use of Tenses in Sentence forming | [3] |
| Unit 3 | Direct and Indirect Speech, Active and Passive Voice<br>Use of Modal verbs in Sentence Forming, Substitution and Elimination | [3] |
| Unit 4 | Use of Proverbs, Idioms and Phrases in Sentence Construction, Judgment and Inference Sentence<br>Vocabulary Building in Various Situations | [3] |

## Language Skills- I

| 23HSSM02 | VEC | Language Skills- I | 0-0-2 | Audit |
|----------|-----|--------------------|-------|-------|

| Teaching Scheme: | Examination Scheme: |
|------------------|---------------------|
|                  | CA-I: 25 Marks<br>CA-II: 25 marks |

**Pre-Requisites:** Basics of Programming

**Course Outcomes:** At the end of the course, students will be able to:

| CO1 | Develop flowchart and Algorithm to solve the given problem statements |
|-----|----------------------------------------------------------------------|
| CO2 | Develops programs using Data Types and Operators |
| CO3 | Make use of Decision Making and Looping Statements to develop conditional programs |
| CO4 | Make use of Arrays to develop programs in C language |

## List of Experiment:

1. Explain basics of C such as Editing, Compiling, Error Checking, executing, testing and debugging of Programs and Deign Algorithms and Flowcharts.
2. Explain basics of Variable, Data types and operators and develop programs on arithmetic Operators.
3. Develop programs on Conditional, logical and Bitwise Operators.
4. Develop programs on Size of () and typecasting operator.
5. Develop programs on increment and decrement operator.
6. Develop programs on simple if and if-else statement.
7. Develop programs on simple if-else ladder and Nested if-else.
8. Develop programs on Switch case statement.
9. Develop programs on For-loop & Nested For-loop.
10. Develop programs on while and do-while loop.
11. Develop programs on one dimensional array.
12. Develop programs on two-dimensional array.
13. Develop programs on string handling functions.

## Text Books:

1. C Programming Absolute Beginner's Guide, Que Publishing; 3rd edition (22 August 2013)
2. C Programming Language 2nd Edition, Peasrson Publication

## Reference Books:

1. Programming in C Practical Approach by Ajay Mittal, Pearson
2. Let Us C, By Yashwat Kanetkar

## Modern Indian Language

| 23MILE01 | AEC | Marathi | 2-0-0 | 2 Credits |
|----------|-----|---------|-------|-----------|

| Teaching Scheme | Examination Scheme |
|-----------------|--------------------|
| Lecture: 2 hrs/week | CA –I :25 Marks |
| | CA –II :25 Marks |

**Pre-Requisites**: Nil

**Course Outcomes:** At the end of the course, students will be able to:

| CO1 | Develop the knowledge of local language/mother tongue and relate the same to daily life and social media. |
|-----|------------------------------------------------------------------------------------------------------------|
| CO2 | Make use of rhetoric and verb to form sentences in Marathi Language |
| CO3 | Identity Infinitive compounds in the given Marathi sentence. |
| CO4 | Make use of Phrases and proverbs and form a sentence and Solve Prose Assessment/Summary Writing |
| CO5 | Model a letter to appropriate end user in Marathi Language |
| CO6 | Identity writing type of Marathi stanza and write appropriate writing. |

**Course Contents:**

| अध्याय 01: भाषा परीचय | [4] |
|---|---|
| भाषा आणि व्यक्तिमत्व सहसंबंध, भाषा, जीवनव्यवहार आणि नवमाध्यमे व समाजमाध्यमे, चिन्ह व्यवस्था-विरामचिन्हे, संवाद कौशल्य (तोंडी परीक्षा), सर्वनाम-पुरुषात्मक, दर्शक, संबंधी, प्रश्नार्थक, सामान्य व आत्मवाचक सर्वनाम, विशेषण-गुण विशेषण, संख्या विशेषण, सार्वनामीक विशेषण | |

| अध्याय 02: मराठी व्याकरण | [4] |
|---|---|
| नाम, सर्वनाम, विशेषणे, क्रियापद, क्रियाविशेषण अव्यय, शब्दयोगी अव्यय, उभयान्वयी अव्यय, केवलप्रयोगी अव्यय, विभक्ती व त्याचे प्रकार, काळ व प्रकार | |

| अध्याय 03: अलंकार व क्रियापदे | [4] |
|---|---|
| अलंकार-शब्दलांकर- अनुप्रास, यमक, श्लेष उदाहरणे, अर्थालंकार-उपमा, उत्प्रेक्षा, व्यक्तिरेक, अपदुनती, रूपक, व्यक्तिरेक, अननव्य, अतिशयोक्ती उदाहरणे | |

**Pre-Requisites:** NA

**About Ideathon**

The project is a part of addressing societal and industrial needs. An ideathon is a brief, intense event where students can work on some of the most important problems that the world is facing today. Ideations are brainstorming events where people with diverse knowledge backgrounds, skill sets and interests get together to predetermined problems, and come up with substantive, innovative and comprehensive solutions. An ideathon's output might be ideas, a roadmap or an actionable plan. Teams leverage design thinking and cutting-edge techniques to brainstorm and collaborate on potential solutions within a given time frame.

**Course Outcomes:** At the end of the course, students will be able to:

| CO1 | Identify problems based on societal /research needs |
|---|---|
| CO2 | Apply Knowledge and interpersonal skills to solve societal problems in a group. |
| CO3 | Draw the proper inferences from available results through theoretical/ experimental/simulations. |
| CO4 | Analyze the impact of solutions in societal and environmental context for sustainable development. |
| CO5 | Demonstrate capabilities of self-learning in a group, which leads to lifelong learning. |
| CO6 | Demonstrate project management principles during project work. |

**Head**
Dept. of Mechatronics Engineering
SIT COE,Yadrav

**Course Contents:**

| | |
|---|---|
| **Week 1: Higher Education and Case Study Pedagogy** | [2] |
| • Students shall form a group of 3 to 4 students, while forming a group shall not be allowed less than three or more than four students, as it is a group activity. <br> • Allocation of mentor | |
| **Week 2: Topic Selection** | [2] |
| • Briefly interact with students to provide hand-holding for topic selection. <br> • Students should do survey and identify needs, which shall be converted into problem statement for mini project in consultation with faculty supervisor <br> • **Illustrative Examples: Any Industry or Societal Problem** <br> • Finalization of Title. | |
| **Week 3: Case Study Design/Ideathon: Part 1** | [2] |
| • If needed, provide hand-holding to students for finalizing objectives. <br> • Review the objectives of the case study groups. <br> • Identify what can be quantified related to your topic and how. <br> • Decide objectives for your case study. <br> • Continue reading especially recent work specific to your topic. | |
| **Week 4: Case Study Design/Ideathon: Part 2** | [2] |
| • Prepare a roadmap of your case study, identify what is to be measured on the field. <br> • Ensure student groups have finalized the objectives. | |
| **Week 5: Survey Design** | [2] |
| • Prepare a questionnaire and try it out with your group members as mock. <br> • Decide sampling strategy. | |
| **Week 6: Analysis Phase-1** | [2] |
| • Students in a group shall understand problem effectively, propose multiple solution. <br> • The students have to work on different approaches and search for the different methodology to solve the problem in consultation with the project guide. | |

**Head**
Dept. of Mechatronics Engineering
SIT COE, Yadrav

| | |
|---|---|
| **Week 7 Analysis Phase-2** | [2] |
| • The students have to finalize the best methodology to solve the problem in consultation with the project guide. <br> • 25% Presentation has to be conducted by mentor/guide based on above activity. | |
| **Week 8: Analysis-3** | [2] |
| • Identify appropriate data visualization tools for your case study. <br> • Analyze the data | |
| **Week 9: Analysis-4** | [2] |
| • Identify appropriate data visualization tools for your case study. <br> • Analyze the data | |
| **Week 10: Report writing Part:1** | [2] |
| • Prepare an outline of the report and start organizing the write-up for the first draft. <br> • Prepare and submit the first draft of the report to the course coordinator. | |
| **Week 11: Report writing Part:2** | [2] |
| • Make necessary corrections if any as per the suggestions of course coordinator. <br> • Submit the final draft of the case study | |
| **Week 12: Final Presentation** | [2] |
| • 50% Presentation has to be conducted by mentor/guide based on above activity. | |

### Analytical Skills for Mechatronics

| 23MT2401 | VSEC | Analytical Skills for Mechatronics | 2-0-0 | 2 Credits |
|----------|------|-----------------------------------|-------|-----------|

| Teaching Scheme: | Examination Scheme: |
|------------------|---------------------|
| Lecture: 2 hrs/week | CA –I :25 Marks |
|  | CA –II :25 Marks |

**Pre-Requisites:** Engineering Mathematics-I & II

**Course Outcomes:** At the end of the course, students will be able to:

| CO1 | Apply the definition & properties of Laplace Transform to evaluate the integral & to find Laplace transform of elementary functions and special functions like periodic function, Dirac-delta function & unit step function. |
|-----|---|
| CO2 | Apply the knowledge of Laplace transformation to find solution of linear differentiation equations with constant coefficient. |
| CO3 | Solve partial differential equations & use of separation of variable method to solve heat and Laplace equations. |
| CO4 | Develop the concept of Fourier series expansion of different periodic functions so as to use them in harmonic analysis. |
| CO5 | Solve problems related to Fourier transform and inverse Fourier transform. |
| CO6 | Solve finite difference equation using Z- transform. |

| **Unit 1: Laplace Transform** <br> Definition – conditions for existence; Transforms of elementary functions; Properties of Laplace transforms - Linearity property, first shifting property, second shifting property, transforms of functions multiplied by $t^n$, scale change property, transforms of functions divided by t, transforms of derivatives; Evaluation of integrals by using Laplace transform; Transforms of some special functions- periodic function., Heaviside-unit step function, Dirac delta function. | [8] |
|---|---|
| **Unit 2: Inverse Laplace Transform** <br> Introductory remarks; Inverse transforms of some elementary function, General methods of finding inverse transforms, Partial fraction method and Convolution Theorem for finding inverse Laplace transforms, Applications to find the solutions of linear differential equations and simultaneous linear differential equations with constant coefficients. | [7] |

**Head**
Dept. of Mechatronics Engineering
SIT COE,Yadrav

| | |
|---|---|
| **Unit 3: Partial Differential Equations and Their Applications** <br><br> Formation of Partial differential equations by eliminating arbitrary constants and functions; Equations solvable by direct integration; Linear equations of first order (Lagrange's linear equations); Method of separation of variables – applications to find solutions of one dimensional heat flow equation ($\frac{\partial u}{\partial t} = c^2 \frac{\partial^2 u}{\partial x^2}$), and two dimensional heat flow equation (i.e. Laplace equation ; $\frac{\partial^2 u}{\partial x^2} + \frac{\partial^2 u}{\partial y^2} = 0$). | [8] |
| **Unit 4: Fourier series** <br><br> Definition, Euler's formulae, Conditions for a Fourier expansion, Functions having points of discontinuity, change of interval, expansions of odd and even periodic functions and half range series. | [7] |
| **Unit 5: Fourier Transforms** <br><br> Fourier Transforms, Fourier Sine and Cosine Transforms, Complex form of Fourier Integral, Finite Fourier Sine and Cosine Transform. | [6] |
| **Unit 6: Z Transform** <br><br> Definition, properties of z transform, Z Transform of basic sequences, Z transform of some standard discrete function inverse Z transform. | [6] |

### Material and Manufacturing Technology

| 23MT2402 | PCC | Material and Manufacturing Technology | 3-0-0 | 3 credits |
|----------|-----|---------------------------------------|-------|-----------|

| Teaching Scheme | Examination Scheme |
|-----------------|--------------------|
| Lecture: 3 hrs/week | CA –I :10 Marks |
| | CA –II :10 Marks |
| | Mid Semester Exam: 30 Marks |
| | End Semester Exam: 50 Marks |

**Pre-Requisites**: Engineering Physics, Engineering Chemistry, Basics of mechanical engineering.

**Course Outcomes:**

At the end of the course, the student will be able to:

| CO1 | Understand basics of material science and classify them. |
|-----|----------------------------------------------------------|
| CO2 | Apply suitable testing technique and analyze properties of materials |
| CO3 | Identify and apply material for different applications |
| CO4 | Understanding of material casting techniques |
| CO5 | Understanding of material forming and joining techniques |
| CO6 | Understanding of basic material cutting techniques |

| | |
|---|---|
| **Unit 1. Introduction to Materials Science**<br><br>Overview of Materials Science: Historical perspective, importance in engineering. Classification of Materials: Metals, ceramics, polymers, composites. Atomic Structure and Bonding: Atomic structure, types of bonds, crystal structures. | [6] |
| **Unit 2. Material Properties and Testing**<br><br>Mechanical Properties: Stress-strain behavior, hardness, toughness, fatigue. Thermal Properties: Heat capacity, thermal expansion, thermal conductivity. Electrical Properties: Conductivity, semiconductors, dielectric properties. Testing Methods: Tensile testing, hardness testing, impact testing, nondestructive testing. | [7] |
| **Unit 3. Basic Engineering Materials**<br><br>**Ferrous Alloys**: Steels, cast irons, application, heat treatment of steels, Iron-carbon | [8] |

**Advanced Embedded Systems**

| 23MT2403 | PCC | Advanced Embedded Systems | 3-0-0 | 3Credits |
|---|---|---|---|---|

| Teaching Scheme | Examination Scheme |
|---|---|
| Lecture:3hrs/week | CA –I :10<br>CA–II:10Marks<br>Mid Semester Exam: 30 Marks<br>End Semester Exam:50Marks |

**Pre-Requisites**: Digital Electronics & Microcontrollers

**Course Outcomes:** At the end of the course, students will be able to:

| CO1 | Outline about design issues & components of embedded systems, RISC architecture design philosophy of ARM7. |
|---|---|
| CO2 | Develop embedded C program for interfacing I/O device like LEDs, DC Motors using LPC2148. |
| CO3 | Make use of LPC2148 of extended features of I/Os, Timers, ADC for interfacing peripherals. |
| CO4 | Explain real time operating concepts. |
| CO5 | Explain hardware – software co design issues and testing methodology for embedded system. |
| CO6 | Explain Semaphores, Mutex, Mail Box & Message Queue in µCOSII. |

**Course Contents:**

| Unit1: Introduction to Embedded systems & ARM7 architecture<br><br>Embedded systems (ES) definition, ES components, ES design flow, ES designing & development tools, Characteristics of Embedding Computing, ARM7 registers bank, status registers, pipelining concept, exceptions and vector table, data flow model. | [6] |
|---|---|

**Head**
Dept. of Mechatronics Engineering

## Material and Manufacturing Technology Lab

| 23MT2404 | PCC | Material and Manufacturing Technology Lab | 0-0-2 | 1 Credits |
|----------|-----|-------------------------------------------|-------|-----------|

| Teaching Scheme: | Examination Scheme: |
|---|---|
| Practical: 2 hr/week | CA –I :15 Marks<br>CA –II :15 Marks<br>End Semester Examination: 20 Marks |

**Pre-Requisites: Workshop Practice -1**

**Course Outcomes:** At the end of the course, students will be able to:

| CO1 | Discover microstructure of metals and alloys and investigate the properties of materials |
|-----|------------------------------------------------------------------------------------------|
| CO2 | Perform wood and metal working operations |
| CO3 | Inspect various properties of molding sand |
| CO4 | Demonstrate the various Manufacturing Process like Milling, Drilling etc. |

### List of Experiments:

The term work shall consist of the report on any eight experiments from the following:

1. Prepare sample for microscopic examination and examine microstructure of given sample

2. Test hardness of metals and alloys with instrument available like Rockwell Hardness tester, Vickers Hardness tester, etc.

3. Carpentry shop: one Job of Pattern Making

4. Different Sand Testing Properties like Permeability test and Moisture content etc.

5. One job of plain turning, taper Turning, external threading and knurling operation.

6. One job of drilling-on-drilling Machine.

7. One job of machining on milling machine.

8. One job of welding operation on Arc welding/ Gas welding.

9. Industrial visit to study manufacturing practices. - Visit to foundry/machine shop – study of automation processes, Layout, Material handling equipment & other processes with preparation of report.

10. Industrial visit to study manufacturing practices- Study of the extrusion and drawing process – visit to industry with report presentation

**Pre-Requisites**: Digital electronics & Microcontroller laboratory

**Course Outcomes:** At the end of the course, students will be able to:

| CO1 | Develop an assembly language program using ARM LPC2148 for different applications. |
|-----|-----------------------------------------------------------------------------------|
| CO2 | Interface external devices and I/O with ARM cortex M3 |
| CO3 | Develop C language program and library functions for embedded system applications. |

**List of Experiments:**

Minimum 8 experiments from above list.

1. Introduction to Embedded System
2. Program for turning ON LEDs sequentially.
3. Program for controlling DC Motor.
4. Program for controlling stepper Motor.
5. Program for generating saw-tooth wave using DAC.
6. Program for generating sine wave using DAC.
7. Program for Polled Loops
8. Program for Rate Monotonic Scheduling
9. Program for Earliest Deadline Scheduling
10. Program for Shared Memory Communication

### Object oriented programming Using C++ Laboratory

| 23MT2406 | PCC | Object oriented programming Using C++ Laboratory | 0-0-2 | 1 Credits |
|----------|-----|--------------------------------------------------|-------|-----------|

| Teaching Scheme: | Evaluation Scheme: |
|------------------|--------------------|
| Practical: 2 hours/week/batch | CA –I :15 Marks |
| | CA–II :15 Marks |
| | End Semester Examination: 20 Marks |

**Pre-Requisites:** Computer Programming in C

**Course Outcomes:** At the end of the course students will be able to

| CO1 | Make use of Class, Object and Constructor-Destructor features of OOP. |
|-----|----------------------------------------------------------------------|
| CO2 | Experiment with Inheritance, Virtual Function and Polymorphism operations in OOPs. |
| CO3 | Develop code to illustrate File Handling and Exception Handling. |
| CO4 | Demonstrate use of Friend Function, Data Abstraction and Data Encapsulation with suitable example. |

### List of Experiments:

1. Write a C++ program to demonstrate classes.

2. Class Templates C++ programs using class templates to implement the following using an array

   a ) Stack ADT b) Queue ADT

3. Write a C++ program to demonstrate on constructors and destructors

4. Write a C++ program to demonstrate Function Overloading.

5. Write a C++ program to demonstrate operator '+' overloading to find the addition of

two complex numbers.

6. Write a C++ program to demonstrate inheritance

7. Write a C++ program to demonstrate Friend Function.

8. Write a C++ program to demonstrate Polymorphism ( Virtual Function).

9. Write a C++ program to demonstrate Exception Handling.

10. Write a C++ program to demonstrate File Handling

### Basket 2: Material Handling Equipment

| 23MTMDB2 | MDM | Material Handling Equipment | 3-0-0 | 3 Credits |
|---|---|---|---|---|

| Teaching Scheme | Examination Scheme |
|---|---|
| Lecture:3 hrs/week | CA –I :10 Marks<br>CA –II :10 Marks<br>Mid Semester Exam: 30 Marks<br>End Semester Exam: 50 Marks |

**Pre-Requisites**: Basic Mechanical Engineering.
**Course Outcomes:** At the end of the course, students will be able to:

| CO1 | Understand principles of Material handling systems. |
|---|---|
| CO2 | Explain various components of Material handling systems. |
| CO3 | Understand the working of different conveying machineries. |
| CO4 | Appreciate the different hoisting machinery and equipment. |
| CO5 | Understand the ergonomics of material handling equipment's. |
| CO6 | Explain the basics of process and product layout. |

**Course Contents:**

| Unit 1: Introduction to Material Handling<br>Requirements of good material handling system, Objectives and principles of Material handling, Classification of material handling equipment's, Selection of material handling equipment's, Guidelines for effective utilization of material handling equipment's, Characteristics and classification of materials. | [7] |
|---|---|

**Head**
Dept. of Mechatronics Engineering
SIT COE,Yadrav

| | |
|---|---|
| **Unit 2: Components of material handling**<br>Flexible hoisting appliances - fastening methods - Load handling attachments , Classification of hooks, forged - eye hook - Appliances for suspending hooks- crane grab for unit and piece loads- electric lifting magnet - vacuum lifter - Grabbing attachment for loose materials - crane attachment for handling liquids - Arresting gear – brakes - construction - working – electromagnetic shoe brakes | [7] |
| **Unit 3: Conveyor Equipments**<br>Classification of conveyor systems, Types of Belt conveyor, Chain conveyor, Roller conveyor, Pneumatic conveyors. Parts of conveyor, Surface transport equipment - functions - working of trackless equipment - hand operated trucks - powered trucks - tractors, AGV (Automatic Guided Vehicle), Industrial trailers. | [6] |
| **Unit 4: Hoisting machinery and equipments**<br>Working of different type of hoists - Working of different types of cranes - Working of elevating equipments. | [6] |
| **Unit 5: Maintenance and Ergonomics of material handling equipments.**<br>Methods to minimize cost of material handling- Maintenance of material handling equipments, safety in handling & ergonomics of material handling equipment. Design, miscellaneous equipments. | [6] |
| **Unit 6: Plant Layout**<br>Introduction – Objectives of plant layout, classification of layout, advantages and limitations of different layouts, layout design procedures, over view of the plant layout. Process lay out and product lay out selection, Factors influencing layout. | [6] |

**Text Books:**
1. Material Handling Equipment -R.B. Chowdary & G.N.R.Tagore (Khanna Publishers,Delhi)
2. Material Handling - Immer J.R (McGraw Hill, Newyork )
3. Materials Management: Text and Cases, 3rd ed. • - Chitale & Gupta
4. Handbook of Materials Management, 2nd ed.• - Gopalakrishnan & Haleem
5. Plant layout & Material Handling- Apple J.M (John Wiley Publishers

## Language Skill- II

| 23HSSM04 | HSMC | Language Skill- II | 0-0-2 | 1 Credit |
|----------|------|--------------------|-------|----------|

| Teaching Scheme: | Examination Scheme: |
|------------------|---------------------|
| Practical: 2 hrs./week | CA-I: 25 |
| | CA-II: 25 |

**Pre-Requisites:** Language Skill I

**Course Outcomes:** At the end of the course, students will be able to:

| CO1 | Develop programs using Functions. |
|-----|-----------------------------------|
| CO2 | Make use of Structures & Union to develop programs in C language |
| CO3 | Make use of Pointers to develop programs in C language |
| CO4 | Develop programs to perform various operations on files using File Handling. |

---

**List of Experiments:**

1.Develop programs on using different built-in functions.

2.Develop programs on using function without argument and without return category.

3.Develop programs on using function with argument and without return category.

4.Develop programs on using function without argument and with return category.

5.Develop programs on using function with argument and with return category.

6.Develop programs using more than one used defined functions.

7.Develop programs on recursion.

8.Develop programs on Structure using various entities and size of structure.

9.Develop programs on array of structure.

10.Develop programs on structures and functions and compare structure and union.

11.Develop programs to display different data type of data and their addresses using pointer

12.Develop programs on pointer to array, pointer to structure, pointer to functions and pointer expressions.

13.Develop program to read, write and append data from a file.

## Environmental Sciences

| 23MT2407 | VEC | Environmental Sciences | 2-0-0 | 2 Credit |
|---|---|---|---|---|

| Teaching Scheme: | Examination Scheme: |
|---|---|
| Lecture: 2 hrs/week | CA-I: 25 Marks<br>CA-II: 25 Marks |

**Pre-Requisites:** NA

**Course Outcomes:** At the end of the course, students will be able to:

| CO1 | Explain nature of environmental studies |
|---|---|
| CO2 | Explain various natural resources and associated Problems |
| CO3 | Summarize various ecosystems |
| CO4 | Explain the importance of conservation of biodiversity and its importance in balancing the earth. |
| CO5 | Recognize various causes of environmental pollution along with various protection acts in India to limit the pollution |
| CO6 | Interpret the information based on field study and prepare a report. |

## Course Contents

| | |
|---|---|
| **Unit 1: Nature of Environmental studies:**<br>Definition, scope and importance, Multidisciplinary nature of environmental studies. Need for public awareness. | [3] |
| **Unit 2: Natural Resources and Associated Problems**<br>**Forest resources:** Use and over-exploitation, deforestation, dams and their effects on forests and tribal people.<br>**Water resources:** Use and over-utilization of surface and ground water, floods, conflicts over water.<br>**Mineral resources:** Usage and exploitation. Environmental effects of extracting and using mineral resources.<br>**Energy resources:** Growing energy needs, renewable and nonrenewable energy resources, use of alternate energy sources. Solar energy, Biomass energy, Nuclear energy.<br>**Land resources:** land degradation, man induced landslides, soil erosion and desertification.<br>Role of individuals in conservation of natural resources. | [5] |
| **Unit 3: Ecosystems**<br>Concept of an ecosystem, types of ecosystem, structure and function of an ecosystem, producers, consumer and decomposers. Energy flow in the ecosystem, food chain, food web and ecological pyramids, ecological succession. Different types of ecosystem<br>a) Forest ecosystem b)Grassland ecosystem c)Desert ecosystem d)Aquatic ecosystem | [4] |

**Head**
Dept. of Mechatronics Engineering
SIT COE,Yadrav

| | |
|---|---|
| **Unit 4: Biodiversity**<br>Introduction-Definition: genetic, species and ecosystem diversity, Value of biodiversity: consumptive use, productive use, social, ethical, aesthetic and option values, Western Ghats as a biodiversity region Hot spot of biodiversity. Threats to biodiversity, man and wildlife conflicts. Conservation of biodiversity. In-situ conservation and Ex-situ conservation. | [4] |
| **Unit 5: Environmental Pollution and Environmental Protection**<br>Definition: Causes, effects and control measures of various types of pollution. Solid waste Management: Causes, effects and control measures of urban and industrial wastes. Role of an individual in prevention of pollution, Concept of sustainable development : From Unsustainable to Sustainable development. Environmental Protection Act. Air (Prevention and Control of pollution) Act. Water (Prevention and Control of pollution) Act. Forest conservation Act. Wildlife Protection Act. Human Rights. | [4] |
| **Unit 6: Field work**<br>Visit to a local area to document Environmental assets-River ,Forest ,Grassland<br>Visit to local polluted site<br>Study of common plants, insects, birds<br>Study of ecosystem river, ponds etc | [4] |

### Account and Finance Management

| 23MT2408 | HSSM | Account and Finance Management | 2-0-0 | Audit |
|---|---|---|---|---|

| **Teaching Scheme:** | **Examination Scheme:** |
|---|---|
| Lecture: -2 hrs./week | CA-I: 25 Marks<br>CA-II: 25 Marks |

**Pre-Requisites: None**

**Course Outcomes:** At the end of the course, students will be able to:

| CO1 | Understand and define basic terminology used in finance and account |
|---|---|
| CO2 | Prepare and analyze financial statements and evaluate company in the light of different |
| CO3 | Analyze risk and return of alternative sources of financing |
| CO4 | Estimate cash flows from a project, including operating, net working capital, and capital spending |
| CO5 | To estimate the required return on projects of differing risk, to estimate the cash flows from an investment project, calculate the appropriate discount rate, determine the value added from the project, and make a recommendation to accept or reject the project |
| CO6 | To describe and illustrate the important elements in project finance Using financial calculator and Excel in a variety of problems |

**Course Contents:**

| **Unit 1: Introduction to Financial Accounting, Book keeping and Recording:** Meaning, Scope and importance of Financial Accounting. Financial Accounting – concepts and conventions, classification of accounts, Rules and principles governing Double Entry Book-keeping system, Meaning, Preparation of Journal, Ledger , Cash book and Trial balance. (Practical application on tall) | [4] |
|---|---|
| **Unit 2: Financial Statement Preparation, analysis and Interpretation:** Preparation of financial statement and Profit and Loss Account, Balance Sheet, Ratio Analysis - classification of various ratios. (Calculation on Excel) | [4] |

**Head**
Dept. of Mechatronics Engineering
SIT COE,Yadrav

| | |
|---|---|
| **Unit 3: Introduction To Financial Management:** Concept of business finance, Goals and objectives of financial management, Sources of financing – LONG TERM: shares, debentures, term loans, lease and hire purchase, retained earnings, public deposits, bonds (Types, features and utility), SHORT TERM: bank finance, commercial paper, trade credit and bills discounting, INTERNAL: Retained earnings. | [4] |
| **Unit 4: Working Capital Management:** Concept of Working Capital, significance, types. Adequacy of working capital, Factors affecting working capital needs, Financing approaches for working capital, Methods of Forecasting working capital requirements ,mini and importance of accounts receivable | [4] |
| **Unit 5: Time value of money and capital budgeting:** Concept of time value of money, compounding and discounting; future value of single amount and annuity ,present value of single amount and annuity; practical application of time value techniques. capital budgeting -nature and significance, technique of capital budgeting- Pay back method, accounting rate of return, internal rate of return ,DCF, net present value and profitability index(application on excel) | [4] |
| **Unit 6: Project financing:** Details of the company, its promoters and project finance required ,etc. loan documentation- appraisal of terms loans by finance institution. Basic components of project finance | [4] |
| **Text Books** <br> 1. Financial ,cost and management accounting by Dr.P.Pariasamy,HH Publication <br> 2. Financial management by Khan and Jain Tata McGraw Hill <br> 3. Financial management by Dr.P.C.Tulsian and, S. Chand <br> 4. Financial management by Ravi Kishore Taxmann | |

## Mini Project-III

| 23MT2409 | CEP | Mini Project III | 0-0-2 | 01 Credit |
|----------|-----|------------------|-------|-----------|

| Teaching Scheme | Examination Scheme |
|-----------------|--------------------|
| Practical: 2 hrs/week | CA-I: - 25 Marks<br>CA-II: -25 Marks |

**Pre-Requisites**: Mini Project I, Mini Project II

### About Hackathon

The project is a part of addressing societal and industrial needs. Hackathon is one of the platforms where students will solve real world challenges. This Course focuses on the selection of methods/engineering tools/analytical techniques for problem solving.

Through this course, students will gain the understanding of engineering basics and ideas, gain practical experience, have the opportunity to display their skills and learn about teamwork, financial management, communication skills and responsibility

**Course Outcomes:** At the end of the course, students will be able to:

| CO1 | Select the appropriate method for solving the problem |
|-----|-------------------------------------------------------|
| CO2 | Make use of various engineering techniques and tools to give a solution |
| CO3 | Justify the methods /tools used to develop the solution |
| CO4 | Design / simulate the model/ project work |
| CO5 | Describe the solution with help of a project report and presentation |
| CO6 | Conclude the outcomes of project. |

### Course Contents:

| Week 1: Survey Design-1<br>• Ensure case study group students have made necessary communication and done a preparatory visit.<br>• Watch the lecture on survey design and study the notes.<br>• Prepare a questionnaire and try it out with your group members as mock. | [2] |
|---|---|

Head
Dept. of Mechatronics Engineering
SIT COE,Yadrav

| | |
|---|---|
| **Week 2: Survey Design-2**<br>• Review survey questionnaire prepared by case study groups.<br>• Decide sampling strategy.<br>• Prepare a detailed schedule for fieldwork | [2] |
| **Week 3: Fieldwork**<br>• Data Collection: Collect quantitative data (e.g., statistics, usage metrics) and qualitative data (e.g., user stories, testimonials).<br>• Use data collection tools like questionnaires, observation checklists, and digital analytics.<br>• Ensure data accuracy and reliability through proper sampling and recording methods. | [2] |
| **Week 4: Trails and Experimentation-1**<br>• Initial Setup and Configuration<br>• Concept Validation<br>• Feasibility Testing | [2] |
| **Week 5: Trails and Experimentation-2**<br>• Prototyping<br>• Functionality Testing | [2] |
| **Week 6: Trails and Experimentation-3**<br>• Bug Identification and Fixing<br>• Integration Testing<br>• Security Testing<br>• 75% Presentation has to be conducted by mentor/guide based on above activity. | [2] |
| **Week 7: Results**<br>• Coordinator has to check and verify below points in term of result:<br>• Functional Performance<br>• Accuracy and Precision<br>• Efficiency<br>• Safety | [2] |
| **Week 8: Validation**<br>• Coordinator has to check and verify below points in term of validation:<br>• Testing and Verification<br>• Compliance with Standards | [2] |
| **Week 9: Integration Testing**<br>• Validate that the hardware integrates seamlessly with other systems or components as intended<br>• Perform compatibility tests with software, other hardware, and network systems. | [2] |

| Teaching Scheme | Examination Scheme |
|---|---|
| Lecture: 3 hrs/week | CA–I :10 Marks |
| | CA–II :10 Marks |
| | Mid Semester Exam: 30 Marks |
| | End Semester Exam: 50 Marks |

**Pre-Requisites**: Basic physics, Basic mathematics, Fundamentals of engineering
**Course Outcomes:** At the end of the course, students will be able to:

| CO1 | Explain fluid characteristics, including density, viscosity, and surface tension. |
|---|---|
| CO2 | Elaborate fluid flow patterns, continuity equations, and Bernoulli's equation |
| CO3 | Outline basic thermodynamic concepts, laws, and applications. |
| CO4 | Importance of heat conduction, convection, and radiation, along with heat exchangers. |
| CO5 | Discuss compressors, gas turbines, and their applications. |
| CO6 | Elaborate cooling systems, psychometrics, and real-world applications. |

**Course Contents:**

| Unit 1 -Properties of Fluids<br>Characteristics of fluids: Mass density, specific density, specific gravity, dynamic viscosity, kinematic viscosity, surface tension, compressibility, vapour pressure and cavitation.<br>Fluid Statics: Hydrostatics law, Pascal's law, Pressure at a point, Total pressure, Centre of pressure, Buoyancy, Stability of submerged and floating bodies, Metacentres. | [6] |
|---|---|
| Unit 2 -Fluid Kinematics and Dynamics<br>Introduction to Fluid Kinematics: Types of flows, continuity equation (Cartesian coordinate), visualization of flow field (stream, path and streak Line), stream and velocity potential function.<br>Fluid Dynamics: Euler's equation of motion along a streamline, Bernoulli's equation, Applications of Bernoulli's equation, Flow measurement techniques: Venturi meter, Orifice meter, Pitot tube | [6] |
| Unit 3-Introduction of thermodynamics<br>Basic concepts: system, surroundings, and properties of thermodynamic systems, Thermal equilibrium, processes, and cycles. | [6] |

## Fluid and Thermal Engineering Laboratory

| 23MT2304 | PCC | Fluid and Thermal Engineering Laboratory | 0-0-2 | 1 Credits |
|----------|-----|------------------------------------------|-------|-----------|

| Teaching Scheme: | Evaluation Scheme: |
|------------------|--------------------|
| Practical: 2 hours/week | CA–I :15 Marks<br>CA –II :15 Marks<br>End Semester Examination: 20 Marks |

**Pre-Requisites:** Engineering Physics, Engineering Mechanics

**Course Outcomes:** At the end of the course students will be able to -

| CO1 | Measure and analyze fluid behavior, including pressure, viscosity, and energy conservation. |
|-----|---------------------------------------------------------------------------------------------|
| CO2 | Evaluate thermal properties and heat transfer in various materials and systems. |
| CO3 | Demonstrate practical skills in operating, maintaining, and evaluating engine and compressor systems. |
| CO4 | Interpret theoretical knowledge with practical applications through simulations, experiments and industrial visits. |

**List of Experiments:**

At least a minimum of 8 experiments should be performed from the following list.

1. Demonstrate Pressure Measuring Devices

2. Calibration of Venturi meter and Orifice meter

3. Verification of Bernoulli's equation

4. Determination of major losses /minor losses in pipe fittings Apparatus

5. Reynolds Experiment

6. Study and Trial on Blower

7. Dismantling and assembly of IC engines

8. Study of two and four-stroke petrol and diesel engines

9. Determination of Heat Transfer Coefficient under forced convection

10. Software demonstration related to fluid mechanics and thermal engineering simulations

11. Determination of thermal resistance and temperature distribution in a Composite wall.

12. Industrial visit report

**Head**
**Dept. of Mechatronics Engineering**
**SIT COE,Yadrav**

**Text Books:**

1. Sukumar Pati, "Fluid Mechanics and Hydraulics Machines", TATA McGraw Hill.

2. Munson, Young and Okiishi, "Fundamentals of Fluid Mechanics", Wiley India

3. Modi P. N. and Seth S. M, "Hydraulics and Fluid Mechanics", Standard Book House.

4. P.K. Nag, Heat & Mass Transfer, McGraw Hill Education Private Limited.

5. M.M. Rathod, Engineering Heat and Mass Transfer, Third Edition, Laxmi Publications.

6. V. M. Domkundwar, Heat Transfer, Dhanpat Rai & Co Ltd.

**Reference Books:**

**Sensors and Instrumentation Laboratory**

| 23MT2305 | PCC | Sensors and Instrumentation Laboratory | 0-0-2 | 1 Credits |
|---|---|---|---|---|

| Teaching Scheme: | Evaluation Scheme: |
|---|---|
| Practical: 2 hours/week | CA–I :25 Marks<br>CA –II :25 Marks |

**Pre-Requisites:** Basic knowledge of Semiconductor Physics and Basic Electronics.

**Course Outcomes:** At the end of the course students will be able to -

| CO1 | Explain the characteristics of Instruments. |
|---|---|
| CO2 | Select appropriate sensor for given application. |
| CO3 | Illustrate various smart sensors with their applications. |

**List of Experiments:**

At least minimum 8 experiments should be performed from the following list.

1. Introduction to Instrumentation& Identify contact &Non-contact type Instruments.
2. Study of Characteristics of LVDT.
3. Study of potentiometer as Error Detector.
4. Characteristics of temperature sensors.
5. Measurement of Speed using tachometer/Photoelectric pickup/Proximity switch.
6. Pressure measurement using pressure cell.
7. Study of Hall effect sensor.
8. Measurement of strain using strain gauge.
9. Measurement of flow using Rotameter.
10. Measurement of sound using sound meter.
11. Study of Liquid level measurement using proximity switch.
12. Study of Smart sensors.
13. Case Study of different sensors used in Automobiles.

## Digital Electronics and Microcontrollers Laboratory

| 23MT2306 | PCC | Digital Electronics and Microcontrollers Laboratory | 0-0-2 | 1 Credits |
|----------|-----|------------------------------------------------------|-------|-----------|

| Teaching Scheme | Examination Scheme |
|-----------------|--------------------|
| Lecture:2hrs/week | CA –I :15 Marks<br>CA–II:15 Marks<br>End Semester Examination:20Marks |

**Pre-Requisites**: Basic Electronics, Logic Gate
**Course Outcomes:** At the end of the course, students will be able to:

| CO1 | Demonstrate the truth table of logic gates and combinational circuits using logic gates. |
|-----|------------------------------------------------------------------------------------------|
| CO3 | Construct sequential circuits using logic gates or IC's. |
| CO4 | Develop an assembly language program for arithmetic & logical operations using 8051 |
| CO5 | Design a circuit to interface stepper motor, keyboard, ADC to 8051. |

## List of Experiments:

Minimum 8 experiments from above list out of which at least 4 should be on 8051 Microcontroller.

1. Implementation of Boolean Logic Functions using logic gates and combinational circuits

2. Design and implement Half adder, Full Adder, Half Subtractor, Full Subtractor using basic gates.

3. Given any 4-variable logic expression, simplify using Entered 16 Variable Map and realize the simplified logic expression using 8:1 multiplexer IC.

4. Design and implement code converter I) Binary to Gray II) Gray to Binary Code using basic gates.

5. Design and verify the Truth Table of 3-bit Parity Generator and 4-bit Parity Checker using basic logic gates with an even parity bit.

6. Realize a J-K Master/Slave Flip-Flop using NAND gates and verify its truth table.

7. Write an ALP for 8051 Addition, Subtraction, Multiplication & Division

Head
Dept. of Mechatronics Engineering
SIT COE,Yadrav

8. Data transfer and data exchange using 8051.

9. Conditional Operations using 8051.

10. Timer Operation for square wave generation using 8051

11. Serial data transmission using 8051.

12. Toggle bits of Port.

13. LCD Interfacing, stepper motor interfacing using 8051.

**Text Books:**

1. Fundamentals of Digital Circuits by Anand Kumar, TMH publication.

2. M Morris Mano: Digital Logic and Computer Design, 10th Edition, Pearson, 2008

3. The 8051 Microcontroller By Ayala 3rd Edition

4. The 8051 Microcontroller & Embedded Systems By Muhammad Ali Mazidi & Janice Gillispie Mazidi Pearson Edition L.P.E

**Pre-Requisites:** Basics of Programming

**Course Outcomes:** At the end of the course, students will be able to:

| CO1 | Develop flowchart and Algorithm to solve the given problem statements |
|-----|----------------------------------------------------------------------|
| CO2 | Develops programs using Data Types and Operators |
| CO3 | Make use of Decision Making and Looping Statements to develop conditional programs |
| CO4 | Make use of Arrays to develop programs in C language |

**List of Experiment:**
1. Explain basics of C such as Editing, Compiling, Error Checking, executing, testing and debugging of Programs and Deign Algorithms and Flowcharts.
2. Explain basics of Variable, Data types and operators and develop programs on arithmetic Operators.
3. Develop programs on Conditional, logical and Bitwise Operators.
4. Develop programs on Size of () and typecasting operator.
5. Develop programs on increment and decrement operator.
6. Develop programs on simple if and if-else statement.
7. Develop programs on simple if-else ladder and Nested if-else.
8. Develop programs on Switch case statement.
9. Develop programs on For-loop & Nested For-loop.
10. Develop programs on while and do-while loop.
11. Develop programs on one dimensional array.
12. Develop programs on two-dimensional array.
13. Develop programs on string handling functions.

### Modern Indian Language

| 23MILE01 | AEC | Marathi | 2-0-0 | 2 Credits |
|----------|-----|---------|-------|-----------|

| Teaching Scheme | Examination Scheme |
|-----------------|--------------------|
| Lecture: 2 hrs/week | CA –I :25 Marks |
| | CA –II :25 Marks |

**Pre-Requisites**: Nil

**Course Outcomes:** At the end of the course, students will be able to:

| CO1 | Develop the knowledge of local language/mother tongue and relate the same to daily life and social media. |
|-----|------------------------------------------------------------------------------------------------------------|
| CO2 | Make use of rhetoric and verb to form sentences in Marathi Language |
| CO3 | Identity Infinitive compounds in the given Marathi sentence. |
| CO4 | Make use of Phrases and proverbs and form a sentence and Solve Prose Assessment/Summary Writing |
| CO5 | Model a letter to appropriate end user in Marathi Language |
| CO6 | Identity writing type of Marathi stanza and write appropriate writing. |

**Course Contents:**

| अध्याय 01: भाषा परीचय | [4] |
|----------------------|-----|
| भाषा आणि व्यक्तिमत्व सहसंबंध, भाषा, जीवनव्यवहार आणि नवमाध्यमे व समाजमाध्यमे, चिन्ह व्यवस्था-विरामचिन्हे, संवाद कौशल्य (तोंडी परीक्षा), सर्वनाम-पुरुषात्मक, दर्शक, संबंधी, प्रश्नार्थक, सामान्य व आत्मवाचक सर्वनाम, विशेषण-गुण विशेषण, संख्या विशेषण, सार्वनामीक विशेषण | |

| अध्याय 02: मराठी व्याकरण | [4] |
|------------------------|-----|
| नाम, सर्वनाम, विशेषणे, क्रियापद, क्रियाविशेषण अव्यय, शब्दयोगी अव्यय, उभयान्वयी अव्यय, केवलप्रयोगी अव्यय, विभक्ती व त्याचे प्रकार, काळ व प्रकार | |

| अध्याय 03: अलंकार व क्रियापदे | [4] |
|---------------------------|-----|
| अलंकार-शब्दलांकर- अनुप्रास, यमक, श्लेष उदाहरणे, अर्थालंकार-उपमा, उत्प्रेक्षा, व्यक्तिरेक, अपदुनती, रूपक, व्यक्तिरेक, अननव्य, अतिशयोक्ती उदाहरणे | |

### Mini Project -II

| 23MT2308 | CEP | Mini Project -II | 0-0-2 | Audit |
|----------|-----|------------------|-------|-------|

| Teaching Scheme: | Examination Scheme: |
|------------------|---------------------|
| Practical: 2 hrs/week | CA –I :25 Marks |
| | CA –II :25 Marks |

**Pre-Requisites:** NA

**About Ideathon**

The project is a part of addressing societal and industrial needs. An ideathon is a brief, intense event where students can work on some of the most important problems that the world is facing today. Ideations are brainstorming events where people with diverse knowledge backgrounds, skill sets and interests get together to predetermined problems, and come up with substantive, innovative and comprehensive solutions. An ideathon's output might be ideas, a roadmap or an actionable plan. Teams leverage design thinking and cutting-edge techniques to brainstorm and collaborate on potential solutions within a given time frame.

**Course Outcomes:** At the end of the course, students will be able to:

| CO1 | Identify problems based on societal /research needs |
|-----|------------------------------------------------------|
| CO2 | Apply Knowledge and interpersonal skills to solve societal problems in a group. |
| CO3 | Draw the proper inferences from available results through theoretical/ experimental/simulations. |
| CO4 | Analyze the impact of solutions in societal and environmental context for sustainable development. |
| CO5 | Demonstrate capabilities of self-learning in a group, which leads to lifelong learning. |
| CO6 | Demonstrate project management principles during project work. |

Head
Dept. of Mechatronics Engineering
SIT COE,Yadrav

**Course Contents:**

| | |
|---|---|
| **Week 1: Higher Education and Case Study Pedagogy** | [2] |
| • Students shall form a group of 3 to 4 students, while forming a group shall not be allowed less than three or more than four students, as it is a group activity.<br>• Allocation of mentor | |
| **Week 2: Topic Selection** | [2] |
| • Briefly interact with students to provide hand-holding for topic selection.<br>• Students should do survey and identify needs, which shall be converted into problem statement for mini project in consultation with faculty supervisor<br>• **Illustrative Examples: Any Industry or Societal Problem**<br>• Finalization of Title. | |
| **Week 3: Case Study Design/Ideathon: Part 1** | [2] |
| • If needed, provide hand-holding to students for finalizing objectives.<br>• Review the objectives of the case study groups.<br>• Identify what can be quantified related to your topic and how.<br>• Decide objectives for your case study.<br>• Continue reading especially recent work specific to your topic. | |
| **Week 4: Case Study Design/Ideathon: Part 2** | [2] |
| • Prepare a roadmap of your case study, identify what is to be measured on the field.<br>• Ensure student groups have finalized the objectives. | |
| **Week 5: Survey Design** | [2] |
| • Prepare a questionnaire and try it out with your group members as mock.<br>• Decide sampling strategy. | |
| **Week 6: Analysis Phase-1** | [2] |
| • Students in a group shall understand problem effectively, propose multiple solution.<br>• The students have to work on different approaches and search for the different methodology to solve the problem in consultation with the project guide. | |

Head
Dept. of Mechatronics Engineering
SIT COE, Yadrav

| | |
|---|---|
| **Week 7 Analysis Phase-2** | [2] |
| • The students have to finalize the best methodology to solve the problem in consultation with the project guide.<br><br>• 25% Presentation has to be conducted by mentor/guide based on above activity. | |
| **Week 8: Analysis-3** | [2] |
| • Identify appropriate data visualization tools for your case study.<br><br>• Analyze the data | |
| **Week 9: Analysis-4** | [2] |
| • Identify appropriate data visualization tools for your case study.<br><br>• Analyze the data | |
| **Week 10: Report writing Part:1** | [2] |
| • Prepare an outline of the report and start organizing the write-up for the first draft.<br><br>• Prepare and submit the first draft of the report to the course coordinator. | |
| **Week 11: Report writing Part:2** | [2] |
| • Make necessary corrections if any as per the suggestions of course coordinator.<br><br>• Submit the final draft of the case study | |
| **Week 12: Final Presentation** | [2] |
| • 50% Presentation has to be conducted by mentor/guide based on above activity. | |

## Analytical Skills for Mechatronics

| 23MT2401 | VSEC | Analytical Skills for Mechatronics | 2-0-0 | 2 Credits |
|----------|------|-------------------------------------|-------|-----------|

| Teaching Scheme: | Examination Scheme: |
|------------------|---------------------|
| Lecture: 2 hrs/week | CA –I :25 Marks |
| | CA –II :25 Marks |

**Pre-Requisites:** Engineering Mathematics-I & II

**Course Outcomes:** At the end of the course, students will be able to:

| CO1 | Apply the definition & properties of Laplace Transform to evaluate the integral & to find Laplace transform of elementary functions and special functions like periodic function, Dirac-delta function & unit step function. |
|-----|--------------------------------------------------------------------------------|
| CO2 | Apply the knowledge of Laplace transformation to find solution of linear differentiation equations with constant coefficient. |
| CO3 | Solve partial differential equations & use of separation of variable method to solve heat and Laplace equations. |
| CO4 | Develop the concept of Fourier series expansion of different periodic functions so as to use them in harmonic analysis. |
| CO5 | Solve problems related to Fourier transform and inverse Fourier transform. |
| CO6 | Solve finite difference equation using Z- transform. |

| **Unit 1: Laplace Transform**<br>Definition – conditions for existence; Transforms of elementary functions; Properties of Laplace transforms - Linearity property, first shifting property, second shifting property, transforms of functions multiplied by $t^n$, scale change property, transforms of functions divided by t, transforms of derivatives; Evaluation of integrals by using Laplace transform; Transforms of some special functions- periodic function, Heaviside-unit step function, Dirac delta function. | [8] |
|---|---|
| **Unit 2: Inverse Laplace Transform**<br>Introductory remarks; Inverse transforms of some elementary function, General methods of finding inverse transforms, Partial fraction method and Convolution Theorem for finding inverse Laplace transforms, Applications to find the solutions of linear differential equations and simultaneous linear differential equations with constant coefficients. | [7] |

**Head**
Dept. of Mechatronics Engineering
SIT COE,Yadrav

| | |
|---|---|
| **Unit 3: Partial Differential Equations and Their Applications**<br>Formation of Partial differential equations by eliminating arbitrary constants and functions; Equations solvable by direct integration; Linear equations of first order (Lagrange's linear equations); Method of separation of variables – applications to find solutions of one dimensional heat flow equation ( $\frac{\partial u}{\partial t} = c^2 \frac{\partial^2 u}{\partial x^2}$), and two dimensional heat flow equation (i.e. Laplace equation ; $\frac{\partial^2 u}{\partial x^2} + \frac{\partial^2 u}{\partial y^2} = 0$). | [8] |
| **Unit 4: Fourier series**<br>Definition, Euler's formulae, Conditions for a Fourier expansion, Functions having points of discontinuity, change of interval, expansions of odd and even periodic functions and half range series. | [7] |
| **Unit 5: Fourier Transforms**<br>Fourier Transforms, Fourier Sine and Cosine Transforms, Complex form of Fourier Integral, Finite Fourier Sine and Cosine Transform. | [6] |
| **Unit 6: Z Transform**<br>Definition, properties of z transform, Z Transform of basic sequences, Z transform of some standard discrete function inverse Z transform. | [6] |

**Textbook/s**

## Material and Manufacturing Technology Lab

| 23MT2404 | PCC | Material and Manufacturing Technology Lab | 0-0-2 | 1 Credits |
|----------|-----|-------------------------------------------|-------|-----------|

| Teaching Scheme: | Examination Scheme: |
|------------------|---------------------|
| Practical: 2 hr/week | CA –I :15 Marks |
| | CA –II :15 Marks |
| | End Semester Examination: 20 Marks |

**Pre-Requisites: Workshop Practice -I**

**Course Outcomes:** At the end of the course, students will be able to:

| CO1 | Discover microstructure of metals and alloys and investigate the properties of materials |
|-----|-------------------------------------------------------------------------------------------|
| CO2 | Perform wood and metal working operations |
| CO3 | Inspect various properties of molding sand |
| CO4 | Demonstrate the various Manufacturing Process like Milling, Drilling etc. |

## List of Experiments:

The term work shall consist of the report on any eight experiments from the following:

1. Prepare sample for microscopic examination and examine microstructure of given sample
2. Test hardness of metals and alloys with instrument available like Rockwell Hardness tester, Vickers Hardness tester, etc.
3. Carpentry shop: one Job of Pattern Making
4. Different Sand Testing Properties like Permeability test and Moisture content etc.
5. One job of plain turning, taper Turning, external threading and knurling operation.
6. One job of drilling-on-drilling Machine.
7. One job of machining on milling machine.
8. One job of welding operation on Arc welding/ Gas welding.
9. Industrial visit to study manufacturing practices. - Visit to foundry/machine shop – study of automation processes, Layout, Material handling equipment & other processes with preparation of report.
10. Industrial visit to study manufacturing practices- Study of the extrusion and drawing process – visit to industry with report presentation

**Pre-Requisites**: Digital electronics & Microcontroller laboratory

**Course Outcomes:** At the end of the course, students will be able to:

| CO1 | Develop an assembly language program using ARM LPC2148 for different applications. |
|---|---|
| CO2 | Interface external devices and I/O with ARM cortex M3 |
| CO3 | Develop C language program and library functions for embedded system applications. |

**List of Experiments:**

Minimum 8 experiments from above list.

1. Introduction to Embedded System
2. Program for turning ON LEDs sequentially.
3. Program for controlling DC Motor.
4. Program for controlling stepper Motor.
5. Program for generating saw-tooth wave using DAC.
6. Program for generating sine wave using DAC.
7. Program for Polled Loops
8. Program for Rate Monotonic Scheduling
9. Program for Earliest Deadline Scheduling
10. Program for Shared Memory Communication

### Object oriented programming Using C++ Laboratory

| 23MT2406 | PCC | Object oriented programming Using C++ Laboratory | 0-0-2 | 1 Credits |
|----------|-----|--------------------------------------------------|-------|-----------|

| Teaching Scheme: | Evaluation Scheme: |
|------------------|--------------------|
| Practical: 2 hours/week/batch | CA –I :15 Marks |
| | CA–II :15 Marks |
| | End Semester Examination: 20 Marks |

**Pre-Requisites:** Computer Programming in C

**Course Outcomes:** At the end of the course students will be able to

| CO1 | Make use of Class, Object and Constructor-Destructor features of OOP. |
|-----|----------------------------------------------------------------------|
| CO2 | Experiment with Inheritance, Virtual Function and Polymorphism operations in OOPs. |
| CO3 | Develop code to illustrate File Handling and Exception Handling. |
| CO4 | Demonstrate use of Friend Function, Data Abstraction and Data Encapsulation with suitable example. |

**List of Experiments:**

1. Write a C++ program to demonstrate classes.

2. Class Templates C++ programs using class templates to implement the following using an array

   a ) Stack ADT b) Queue ADT

3. Write a C++ program to demonstrate on constructors and destructors

4. Write a C++ program to demonstrate Function Overloading.

5. Write a C++ program to demonstrate operator '+' overloading to find the addition of

two complex numbers.

6. Write a C++ program to demonstrate inheritance

7. Write a C++ program to demonstrate Friend Function.

8. Write a C++ program to demonstrate Polymorphism (Virtual Function).

9. Write a C++ program to demonstrate Exception Handling.

10. Write a C++ program to demonstrate File Handling

### Basket A: Human robot interaction

| 23MTMDA2 | MDM | Human robot interaction | 3-0-0 | 3 Credits |
|----------|-----|-------------------------|-------|-----------|

| Teaching Scheme | Examination Scheme |
|-----------------|--------------------|
| Lecture: 3 hrs/week | CA –I :10 Marks<br>CA –II :10 Marks<br>Mid Semester Exam: 30 Marks<br>End Semester Exam: 50 Marks |

**Pre-Requisites**: Basic physics, Basic mathematics

**Course Outcomes:** At the end of the course, students will be able to:

| CO1 | Understand basic knowledge of robotics |
|-----|----------------------------------------|
| CO2 | Grasp basic knowledge of Human robot interaction |
| CO3 | Explain the need and various systems of the Humanoid / Social robots. |
| CO4 | Use the applications and developments of the Internet of Robotic Things |

**Course Contents:**

| | |
|---|---|
| **Unit 1: Introduction to Human robot interaction**<br>Concept and scope of Human robot interaction Robot: Introduction, Classification of robot, Robot Performance Parameters. | [6] |
| **Unit 2: Basics of Human robot interaction**<br>Definition, History, Need of HRI, Ethical Issues for HRI, Multi-Modal Perception, Social, Service, and Assistive Robotics | [6] |
| **Unit 3: HRI Architecture, Collaborative Robots**<br>HRI Architecture, Collaborative Robots, Definition, Types of Collaboration, Applications of collaborative robots, collaborative Robot Technology. | [6] |
| **Unit 4: Humanoid Robotics Technology and Social Robots**<br>Sensors in Humanoid Robot, Control of Humanoid Robot, actuation types for humanoid Robot, System Integration in Humanoid Robot, Social Robot, Need of Social Robots. | [6] |

Head
Dept. of Mechatronics Engineering

## Basket 2: Material Handling Equipment

| 23MTMDB2 | MDM | Material Handling Equipment | 3-0-0 | 3 Credits |
|---|---|---|---|---|

| Teaching Scheme | Examination Scheme |
|---|---|
| Lecture:3 hrs/week | CA –I :10 Marks<br>CA –II :10 Marks<br>Mid Semester Exam: 30 Marks<br>End Semester Exam: 50 Marks |

**Pre-Requisites**: Basic Mechanical Engineering.

**Course Outcomes:** At the end of the course, students will be able to:

| CO1 | Understand principles of Material handling systems. |
|---|---|
| CO2 | Explain various components of Material handling systems. |
| CO3 | Understand the working of different conveying machineries. |
| CO4 | Appreciate the different hoisting machinery and equipment. |
| CO5 | Understand the ergonomics of material handling equipment's. |
| CO6 | Explain the basics of process and product layout. |

**Course Contents:**

| Unit 1: Introduction to Material Handling<br>Requirements of good material handling system, Objectives and principles of Material handling, Classification of material handling equipment's, Selection of material handling equipment's, Guidelines for effective utilization of material handling equipment's, Characteristics and classification of materials. | [7] |

|---|---|---|---|---|

| Teaching Scheme: | Examination Scheme: |
|---|---|
| Practical: 2 hrs./week | CA-I: 25 |
|  | CA-II: 25 |

**Pre-Requisites:** Language Skill I

**Course Outcomes:** At the end of the course, students will be able to:

| CO1 | Develop programs using Functions. |
|---|---|
| CO2 | Make use of Structures & Union to develop programs in C language |
| CO3 | Make use of Pointers to develop programs in C language |
| CO4 | Develop programs to perform various operations on files using File Handling. |

---

**List of Experiments:**

**1.** Develop programs on using different built-in functions.

**2.** Develop programs on using function without argument and without return category.

**3.** Develop programs on using function with argument and without return category.

**4.** Develop programs on using function without argument and with return category.

**5.** Develop programs on using function with argument and with return category.

**6.** Develop programs using more than one used defined functions.

**7.** Develop programs on recursion.

**8.** Develop programs on Structure using various entities and size of structure.

**9.** Develop programs on array of structure.

**10.** Develop programs on structures and functions and compare structure and union.

**11.** Develop programs to display different data type of data and their addresses using pointer

**12.** Develop programs on pointer to array, pointer to structure, pointer to functions and pointer expressions.

**13.** Develop program to read, write and append data from a file.

**Pre-Requisites:** NA

**Course Outcomes:** At the end of the course, students will be able to:

| CO1 | Explain nature of environmental studies |
|---|---|
| CO2 | Explain various natural resources and associated Problems |
| CO3 | Summarize various ecosystems |
| CO4 | Explain the importance of conservation of biodiversity and its importance in balancing the earth. |
| CO5 | Recognize various causes of environmental pollution along with various protection acts in India to limit the pollution |
| CO6 | Interpret the information based on field study and prepare a report. |

**Course Contents**

| Unit 1: Nature of Environmental studies:<br>Definition, scope and importance, Multidisciplinary nature of environmental studies. Need for public awareness. | [3] |
|---|---|
| Unit 2: Natural Resources and Associated Problems<br>**Forest resources:** Use and over-exploitation, deforestation, dams and their effects on forests and tribal people.<br>**Water resources:** Use and over-utilization of surface and ground water, floods, conflicts over water.<br>**Mineral resources:** Usage and exploitation. Environmental effects of extracting and using mineral resources.<br>**Energy resources:** Growing energy needs, renewable and nonrenewable energy resources, use of alternate energy sources. Solar energy, Biomass energy, Nuclear energy.<br>**Land resources:** land degradation, man induced landslides, soil erosion and desertification.<br>Role of individuals in conservation of natural resources. | [5] |
| Unit 3: Ecosystems<br>Concept of an ecosystem, types of ecosystem, structure and function of an ecosystem, producers, consumer and decomposers. Energy flow in the ecosystem, food chain, food web and ecological pyramids, ecological succession. Different types of ecosystem<br>a) Forest ecosystem b)Grassland ecosystem c)Desert ecosystem d)Aquatic ecosystem | [4] |

| Teaching Scheme: | Examination Scheme: |
|------------------|---------------------|
| Lecture: -2 hrs./week | CA-I: 25 Marks |
|  | CA-II: 25 Marks |

**Pre-Requisites: None**

**Course Outcomes:** At the end of the course, students will be able to:

| CO1 | Understand and define basic terminology used in finance and account |
|-----|----------------------------------------------------------------------|
| CO2 | Prepare and analyze financial statements and evaluate company in the light of different |
| CO3 | Analyze risk and return of alternative sources of financing |
| CO4 | Estimate cash flows from a project, including operating, net working capital, and capital spending |
| CO5 | To estimate the required return on projects of differing risk, to estimate the cash flows from an investment project, calculate the appropriate discount rate, determine the value added from the project, and make a recommendation to accept or reject the project |
| CO6 | To describe and illustrate the important elements in project finance Using financial calculator and Excel in a variety of problems |

**Course Contents:**

| Unit 1: Introduction to Financial Accounting, Book keeping and Recording: Meaning, Scope and importance of Financial Accounting. Financial Accounting – concepts and conventions, classification of accounts, Rules and principles governing Double Entry Book-keeping system, Meaning, Preparation of Journal, Ledger , Cash book and Trial balance. (Practical application on tall) | [4] |
|---|---|
| Unit 2: Financial Statement Preparation, analysis and Interpretation: Preparation of financial statement and Profit and Loss Account, Balance Sheet, Ratio Analysis - classification of various ratios. (Calculation on Excel) | [4] |

## Mini Project-III

| 23MT2409 | CEP | Mini Project III | 0-0-2 | 01 Credit |
|----------|-----|------------------|-------|-----------|

| Teaching Scheme | Examination Scheme |
|-----------------|--------------------|
| Practical: 2 hrs/week | CA-I: - 25 Marks |
|  | CA-II: -25 Marks |

**Pre-Requisites**: Mini Project I, Mini Project II

**About Hackathon**

The project is a part of addressing societal and industrial needs. Hackathon is one of the platforms where students will solve real world challenges. This Course focuses on the selection of methods/engineering tools/analytical techniques for problem solving.

Through this course, students will gain the understanding of engineering basics and ideas, gain practical experience, have the opportunity to display their skills and learn about teamwork, financial management, communication skills and responsibility

**Course Outcomes:** At the end of the course, students will be able to:

| CO1 | Select the appropriate method for solving the problem |
|-----|-------------------------------------------------------|
| CO2 | Make use of various engineering techniques and tools to give a solution |
| CO3 | Justify the methods /tools used to develop the solution |
| CO4 | Design / simulate the model/ project work |
| CO5 | Describe the solution with help of a project report and presentation |
| CO6 | Conclude the outcomes of project. |

**Course Contents:**

| **Week 1: Survey Design-1** | |
|---|---|
| • Ensure case study group students have made necessary communication and done a preparatory visit.<br>• Watch the lecture on survey design and study the notes.<br>• Prepare a questionnaire and try it out with your group members as mock. | [2] |

Head
Dept. of Mechatronics Engineering
SIT CCE, Yadrav

| | |
|---|---|
| **Week 2: Survey Design-2**<br>• Review survey questionnaire prepared by case study groups.<br>• Decide sampling strategy.<br>• Prepare a detailed schedule for fieldwork | [2] |
| **Week 3: Fieldwork**<br>• Data Collection: Collect quantitative data (e.g., statistics, usage metrics) and qualitative data (e.g., user stories, testimonials).<br>• Use data collection tools like questionnaires, observation checklists, and digital analytics.<br>• Ensure data accuracy and reliability through proper sampling and recording methods. | [2] |
| **Week 4: Trails and Experimentation-1**<br>• Initial Setup and Configuration<br>• Concept Validation<br>• Feasibility Testing | [2] |
| **Week 5: Trails and Experimentation-2**<br>• Prototyping<br>• Functionality Testing | [2] |
| **Week 6: Trails and Experimentation-3**<br>• Bug Identification and Fixing<br>• Integration Testing<br>• Security Testing<br>• 75% Presentation has to be conducted by mentor/guide based on above activity. | [2] |
| **Week 7: Results**<br>• Coordinator has to check and verify below points in term of result:<br>• Functional Performance<br>• Accuracy and Precision<br>• Efficiency<br>• Safety | [2] |
| **Week 8: Validation**<br>• Coordinator has to check and verify below points in term of validation:<br>• Testing and Verification<br>• Compliance with Standards | [2] |
| **Week 9: Integration Testing**<br>• Validate that the hardware integrates seamlessly with other systems or components as intended<br>• Perform compatibility tests with software, other hardware, and network systems. | [2] |

**Head**
Dept. of Mechatronics Engineering
SIT CCE, Yadrav

| | |
|---|---|
| **Week 10: Documentation and Reporting**<br>• Maintain comprehensive documentation of design, development, testing, and validation processes<br>• Provide detailed reports on test results, issues found, and corrective actions taken. | [2] |
